Research Articles

Experimental investigations on graphene reinforcement in polymer-based matrix for structural applications
Madhusudhan, Ashwin kumar P, Gowresh A M, Veeresh Gachchinamath ............................................ 1

Occupant comfort and energy efficient design for academic buildings in tropical climate
T S Sudheer Kumar, Sanjeev Kumar T M, Akshay Kumar, Harsh Priye .................................................... 6

Design and development of a linear jawed gripper for unstructured environments
Dhruv Kool Rajamani, Kulpreet Singh Dhankar, Eswar Deep Pitchika, Y Shrihari Upadhyaaya ....................... 14

Root cause analysis of inlet hole and leak off hole operation missing problem in Common Rail Injector body using Shainin approach
Nikhil Ghag, Shashank Pansari, Himanshu Sawant .......................................................... 20

Prediction of drugs to be prescribed to a diabetic
Shivani Modi, Aayush Gupta, Ojasva Jain, Mansi Somani ............................................................ 25

Comparative analysis of cooperative sensing techniques in cognitive radio
Monami Dutta Gupta, H Srikanth Kamath ...................... 30
